

## **INBRED MAIZE LINE PH77V**

Gerhard P. Weber

### **Abstract**

5           An inbred maize line, designated PH77V, the plants and seeds of inbred maize  
line PH77V, methods for producing a maize plant, either inbred or hybrid, produced by  
crossing the inbred maize line PH77V with itself or with another maize plant, and hybrid  
maize seeds and plants produced by crossing the inbred line PH77V with another maize  
line or plant and to methods for producing a maize plant containing in its genetic  
10 material one or more transgenes and to the transgenic maize plants produced by that  
method. This invention also relates to inbred maize lines derived from inbred maize line  
PH77V, to methods for producing other inbred maize lines derived from inbred maize  
line PH77V and to the inbred maize lines derived by the use of those methods.
